

What is a Vielight business partner?

Currently Vielight offers two business partnership programs. One program is entitled “Vielight Authorised Reseller”, another — “Vielight Introducer”.

Vielight Authorised Reseller Program

We offer this program to approved health and wellness related businesses and practitioners who want to purchase Vielight products with volume discount and resell them to their customer base.

Vielight carefully preselects appropriate candidates for the Authorised Reseller program to maximize the success of the partnership.

As a Vielight reseller, you will gain:

- Access to a generous tiered discount structure.
- Vielight copyrighted promotional material.
- Personalized support from Vielight staff.

Vielight Introducer Program

The Vielight Introducer program gives anyone who believes in the Vielight technology and wants to promote it the ability to simply earn commissions without the up front investment required in the reseller program. Every Introducer receives a unique “coupon” code to be used by their referrals at the point of purchase.

As a Vielight Introducer you will gain:

- An opportunity to build a passive income stream.
- A commission-based structure, based on revenue collected, with monthly reimbursements.

What do we require?

For the Vielight Authorised Reseller program:

- If you are a practitioner — a degree from a recognized institution is required.
- If you run a business, a physical location, a business license or an established online e-commerce business are required.

Interested?

If you are a practitioner, influencer or a business owner in the health and wellness space, feel free to contact us to see whether you qualify as an affiliate or a reseller for the Vielight brand.

Please contact us at info@vielight.com to see if you qualify.

Please note that we reserve the right to refuse applicants that do not meet certain prerequisites or standards.

About Vielight

We are committed to discovering and harnessing the full potential of red and near infrared light photobiomodulation, stimulation using light, through innovative engineering and ~~clinical~~ research.

Our goal is to improve and enhance one's quality of life by focusing on improving and optimizing neurological and systemic performance. To accomplish this, our home-use devices are designed with quality, effectiveness, and simplicity in mind.

We are looking for dedicated business professionals to collaborate with, to bring Vielight technology to the forefront of as many people as possible.
